

# Call for Papers

*Journal of Dynamics and Games* is pleased to invite paper submissions for  
**Matching : Theory and Applications**,  
a Special Issue dedicated to Marilda Sotomayor on the occasion of her 70th  
birthday.

Marilda Sotomayor is a foundational figure in the development of matching theory and applications in economics with seminal contributions on the structural, game theoretic and mechanism design aspects of the basic model and its extensions. Her volume, **Two-Sided Matching** (1992), co-authored with 2012 Nobel laureate Roth is the singular textbook in the area, which was awarded the prestigious Frederick W. Lanchester Prize.

Papers are welcome on all aspects of matching games and markets, theoretical as well as applied, including the analysis and design of institutions or marketplaces, e.g. for jobs or school choice, for houses or organ exchange.

Please submit your paper directly to one of the invited editors using their email.
